

# From Production to the Market

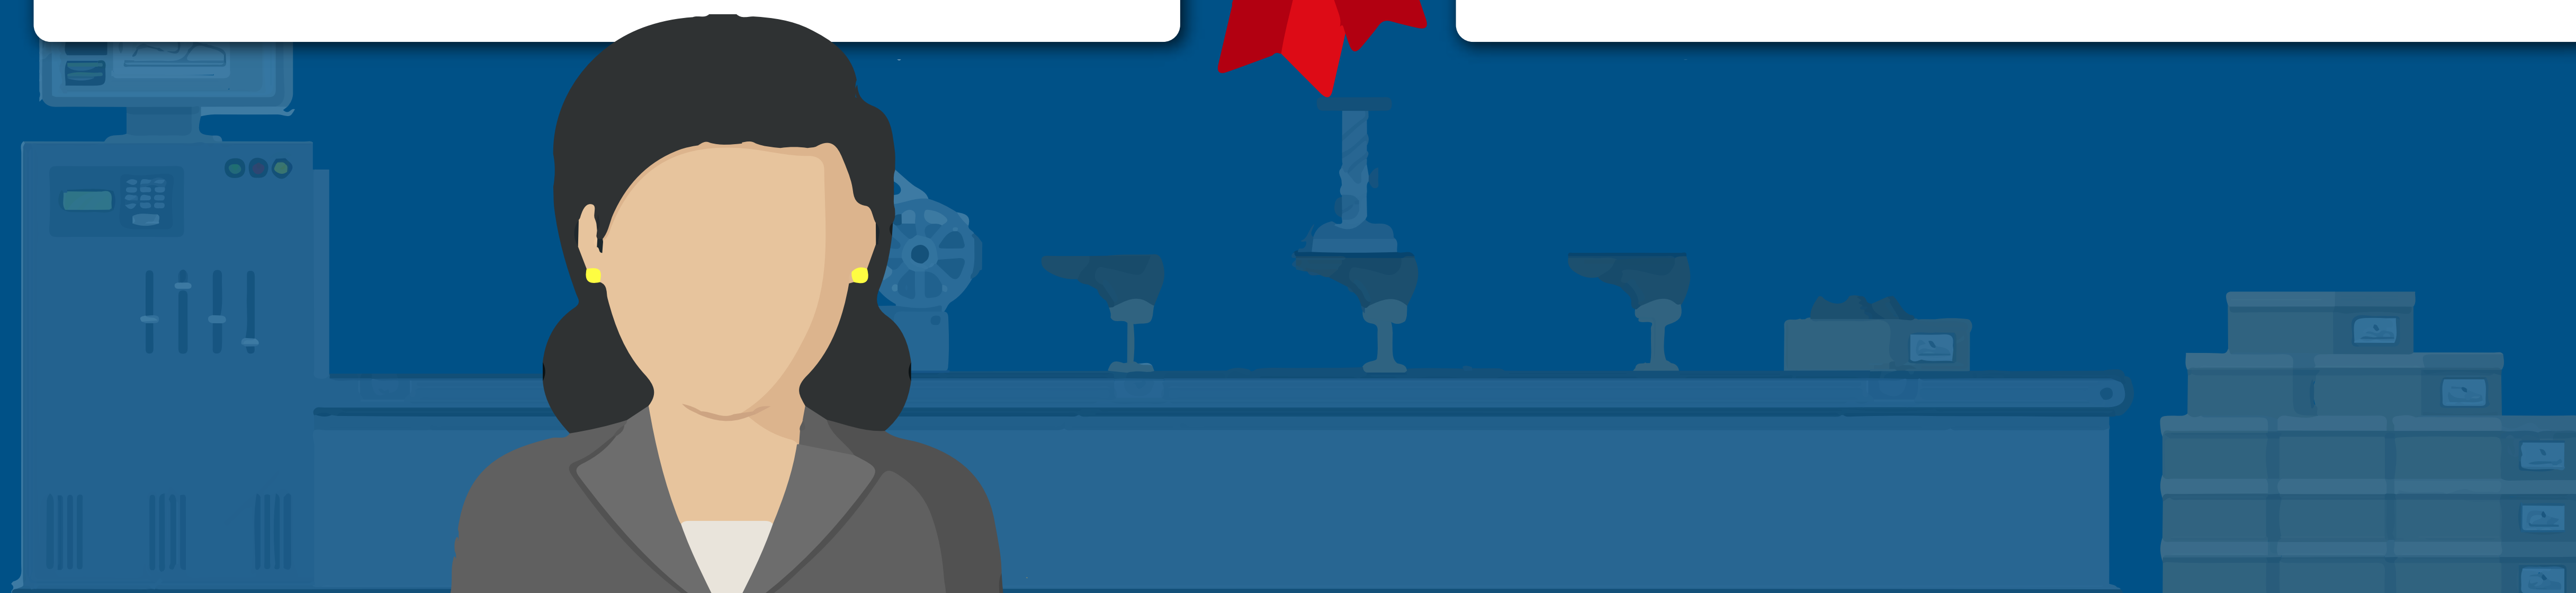

## Footwear\*

Laws and bylaws issued by the Republic of Serbia in the same areas, which are partially harmonized with European legislation

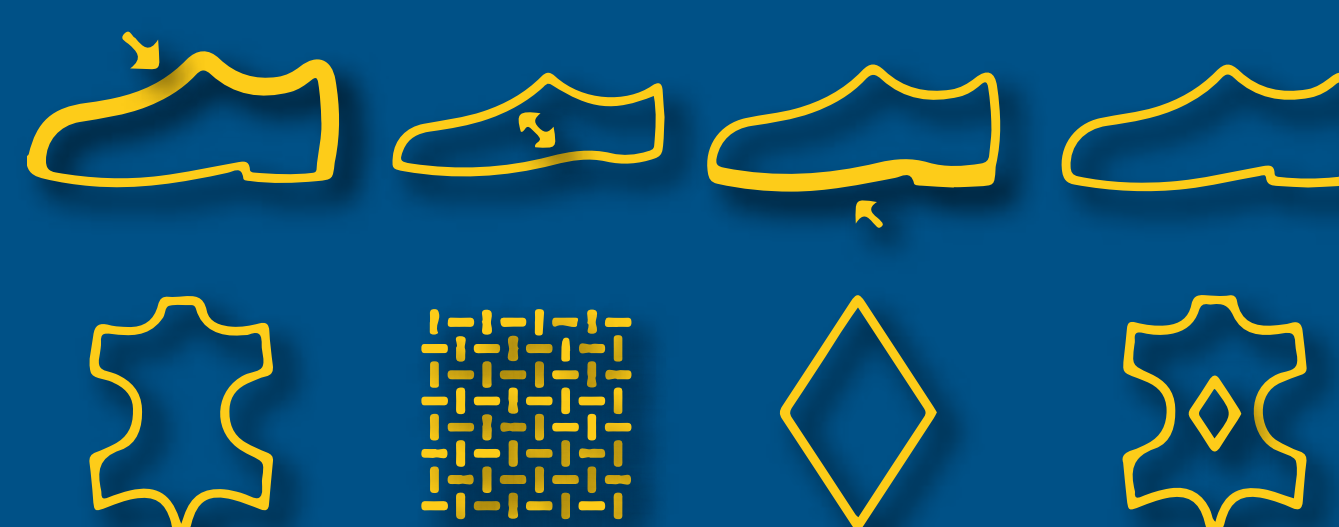

Directives and regulations of the European Union in the areas of production, trade, and use of footwear

A path that a producer from Serbia takes - from production to the market

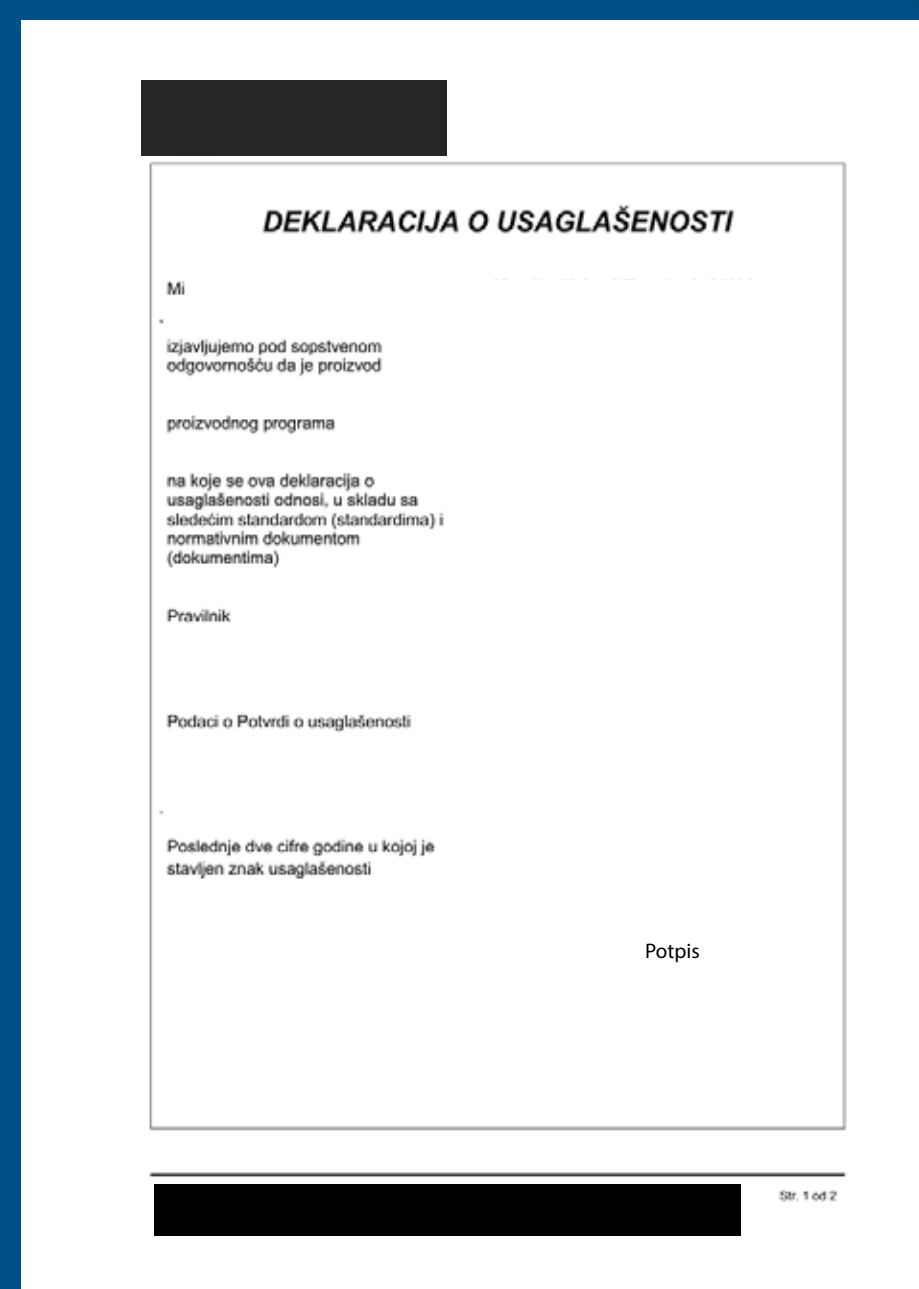

### Marking

The main parts of footwear, materials of main parts of footwear, and additional written information are to be marked

### Compliance Assessment

The manufacturer or an accredited conformity assessment body (depending on the manufacturer's wishes and technical capacities) controls the labeling/additional written information about the product and checks for the use of chemicals whose use is restricted or prohibited in the production of footwear

Example of a declaration of conformity that needs to be completed

### Drawing up a Declaration of Compliance

This process is to be done exclusively under the jurisdiction of the product's manufacturer, distributor, or importer

**Market surveillance**  
(checking the compliance of products placed on the market with regulations)

PLACEMENT ON THE  
SERBIAN MARKET

**NEPRO system**  
(active monitoring and fast exchange of information about hazardous products)

Finding a relevant body for compliance assessment (TOU) in the EU state where export is desired

Acknowledgement of the RS Declaration on Compliance by the TOU

PLACEMENT ON THE  
EUROPEAN MARKET

\* These regulations do not apply to footwear used as personal protective equipment.
